About ISCA, Dharmanagar Chapter:

The Indian Science Congress Association (ISCA) a professional body under Department of Science & Technology, Ministry of Science & Technology, Government of India, owes its origin to the foresight and initiative of two British Indian Chemists, namely, Prof. J.L. Simonsen and Prof. P.S. McMahon. The Association was formed with the following objectives:

- ❖ To advance and promote the cause of science in India
- ❖ To hold an annual congress at a suitable place in India
- ❖ To publish proceedings, journals, transactions and other publications
- ❖ To popularize the benefits of science to the environment and society.

One of the major objectives of the ISCA is to inculcate the scientific temper among the people and to

encourage young scientists to grow up steadily in this direction involving them in the programmes relevant to fundamental, experimental and operational activities. With these objectives in view, ISCA started Chapters from 1986-87 in different places in India. The ISCA DHARMANAGAR chapter was inaugurated by Prof. Ashok Kumar Saxena, in Dharmanagar Tripura on 21.08.2017.

About Govt. Degree College, Dharmanagar, Tripura:

Govt. Degree College, Dharmanagar is located in the North District of Tripura. It is started functioning with B.A (pass) course and with handful students in the premises of Dharmanagar Girls H.S (+2 stage) School on 21st September, 1979. The College now offers Degree programmes for both Pass & Honours in almost all the braches of Science, Commerce & Humanities. It is affiliated to Tripura University (UGC 2F & 2B recognized) and accredited by NAAC (B++, CGPA 2.79).

Focal theme:

The importance of science and technology for rural development has been recognized to a much greater extent and it has been considered to be the main ingredients to solutions to the most severe problems faced by the people in rural areas. In rural areas, there have been improvements in various areas such as the livelihood of the people, educational institutions, medical and health care centres, small scale industries, agriculture, sources of energy, water, housing, information technology, space technology, women and employment opportunities. Developments and progress in all these areas have been as a result of utilization of innovative techniques and science. So the theme of the seminar “**Science and Technology: Rural Development**” is a very vital topic of discussion in the present time and we expect that this seminar will serve as a platform for researchers, academicians, students and industries to share their findings in various fields which will be very much effective for rural development.

The aim of the Seminar is to focus on broad aspects of the use of Science and Technology for rural development, to identify the significance of Science and Technology for rural development, to illustrate the experiences of those working on Science and Technology applications in rural development, to identify the nature of interaction among the generators, the carriers and the users of technology, particularly in the rural areas, to identify the areas requiring technological interventions and the related mechanisms for the generation and diffusion of Science and Technology.
